

Athletic Co-op Activity Overview

In keeping with our mission statement to provide a wide variety of student-selected activities, LCA enters into cooperative partnerships with area schools to offer activities that aren't yet fully sustainable on our own. There are two primary ways a school enters into a co-op. One is with a school that already has a well-established program. Another is to create a program with a partner school of like-minded principles and athletic intentions.

Many of our co-op activities fall into the first category and are hosted by an Anoka-Hennepin area high school. The Anoka-Hennepin School Board has ruled that the formation of co-op activities within their school district will be initiated with schools within the same attendance boundary and must not directly displace students attending the host school. For Legacy, Andover High School is the public school within our attendance boundary and we will initiate all new co-op's with Andover before pursuing opportunities with other AH high schools. *(Existing co-op activities are exempt from this policy and have been grandfathered in.)*

Cooperative opportunities outside of Anoka-Hennepin will be evaluated by the LCA Administration and School Board for student-interest and sustainability before being pursued.

Registration for all cooperative activities is handled through the host school activities office. Students are required to pay the host school fees and DO NOT pay an LCA sports fee.

Fall Activities	Host School	Season Start
