Safety and security continue to be top priorities at Legacy. Since the 2017 launch of our *Beyond Imagination* Strategic Plan, Legacy has worked with multiple highly reputable agencies to do security audits and assessments of our policies and facility. Legacy received high praise for our security protocols and was said to be a leader amongst schools in our intentional security practices. Legacy aspires to stay on track with safety & security measures and has since implemented a number of enhancements including:

- Fire suppression sprinkler system throughout the facility
- Digital visitor check-in system tied to the DMV database
- External security camera upgrades
- Programmable security access at main entrances
- Real-time emergency alerts system for internal staff
- Upgraded paging/announcing systems
- Implementation of mandatory volunteer background checks

Legacy is excited to take another step in this journey by providing a 24/7 **online incident reporting system** to our community called CHIRP-360. CHIRP-360 is a service provided to us through our partnership with 360 Security Services; a local company founded upon its experienced and trusted investigators, analysts, and consultants from various law enforcement and private sector organizations. 360's main operational pillars are **Protection, Intelligence, and Investigations** which function in a continuous cycle of improvement for Legacy Christian Academy. 360 believes in a holistic approach to securing the LCA environment and its community.

CHIRP-360 is being adopted as a proactive strategy to address and mitigate threats or vulnerabilities. It is not intended to take the place of biblical conflict resolution, the partnering process between Legacy and its parents, or face-to-face communication with Legacy's teachers or administration.
>> CHIRP-360 is now available under *Quick Links* on the www.lcamn.org website.

Key Features of CHIRP-360: INCIDENT REPORTING MANAGEMENT

- "Community-Based Tool" designed & managed by former Federal/State Law Enforcement & Security Professionals with understanding of threat data
- Capable of anonymous reporting with third-party objectivity
- Ability for Legacy to manage and conduct investigations in collaboration with experienced professionals and receive qualified recommendations to make appropriate decisions
- Intelligence data and investigative results analyzed for strategies to mitigate threats/vulnerabilities
- Ability to corroborate and track reported and/or recurring incidents/threats to create a safer environment
- Continually improving security processes and controls
